DETAILED ACTION

Amendment

1. Acknowledgement is made of Amendments filed 9 October 2003, 5 November 2003 and 18 December 2003.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

IN THE CLAIMS:

Re claims 53-96: Please cancel claims 53-96 without prejudice and with traverse.

Allowable Subject Matter

3. Claims 15-16 and 26 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The record of prior art fails to teach a method of distributing a plurality of products from a cabinet having a door, the method comprising: fitting each product with a radio frequency identification tag; positioning the plurality of products in the cabinet; sensing opening and closing of the cabinet door; scanning the plurality of products in the cabinet upon sensing closing of the cabinet door to determine the number and type of products in the cabinet; generating a message based on the number and type of products in the cabinet; transmitting the message to a

server; maintaining an inventory in the server based on the message; reading a code on a user badge; acknowledging having read the user badge; determining the authenticity of the code read from the user badge; and opening the cabinet if the code read from the user badge is authentic, wherein the server uses a self-updating boot up procedure, the procedure comprising: (a) receiving a message containing a most recent software version number; (b) comparing a software version number currently used to the most recent software version number; (c) downloading the most recent software version if versions differ when compared; (d) writing the downloaded software to memory; and (e) booting the downloaded software.

Although, de Prins teaches a method of distributing a plurality of products from a lock cabinet having a door, the method comprising: positioning the plurality of products cabinet; sensing opening and closing of the cabinet door; scanning the plurality of products in the cabinet upon sensing closing of the cabinet door to determine the number and type of products in the cabinet; generating a message based on the number and type of products in the cabinet; transmitting the message/data to a server; and maintaining a inventory in the server based on the message. However, de Prins fails to teach or fairly suggest the steps of each product is fitted with a radio frequency identification tag; reading a code on a user badge; acknowledging having read the user badge; determining the authenticity of the code read from the user badge; and opening the cabinet if the code read from the user badge is authentic, wherein the server uses a self-updating boot up procedure, the procedure comprising: (a) receiving a message containing a most recent software version number; (b) comparing a software version number currently used to the most recent software version number; (c) downloading the most recent software version if

versions differ when compared; (d) writing the downloaded software to memory; and (e) booting the downloaded software.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
